

Nano-Tex® and BioAM™ Antimicrobial. Exceptional Product Protection for Exceptional Environments.

Nano-Tex with BioAM provides the high-performance spill and stain resistance with a non-leaching antimicrobial that controls microorganisms that cause odors and stain and it slows the degradation of products. It's a wonderful addition to any indoor or outdoor environment where mold or odor causing microorganisms prey!

BENEFITS

- Fabric aggressively repels liquids and stains
- Liquids can be blotted off the fabric face preventing staining and penetration
- Helps prevent staining of fabric from dirt and spills including coffee, soda, wine, mustard, salad dressing, blood, urine and iodine
- Can be easily cleaned with all cleaning agents including detergents, solvents or 15% diluted bleach (fabric appropriate)

- Maintains natural hand
- Highly breathable and comfortable
- Lasts the life of the fabric
- Durable to laundering; tested up to 50 commercial washings
- Can significantly improve abrasion

- Can keep fabrics that are inherently fire retardant, FR Neutral with accurate knowledge of fiber content

- Reduces odors and stains caused by microbes
- Effective against microbes including bacteria, fungi and algae that cause odors, stains, or product degradation

- Tested and proven durable up to 50 healthcare washings
- Durable for the life of the fabric

- For healthcare, hospitality, cruise lines, educational, corporate, entertainment and residential interiors
- Excellent for cubical, curtains/drapery/sheers, seating, panel fabrics and wallcoverings

- Nano-Tex with BioAM does not affect the recyclability of the fabric
- Contains no arsenic, tin, heavy metals, or silver
- Non-leaching technology does not migrate or rub off
- Inhibits odor-causing microbes through electronic charge

- Seating fabric for high use applications, especially where repeated and frequent cleanings occur
- Complete barrier to liquids, cleaners, and contaminants, making them easily cleanable
- Offers comfort for extended seating periods compared to vinyl and fabrics which do not breathe
- 100% antimony-free recyclable polyester barrier
