

Nano-Tex® for Faux Leather Products. Bring It On Ballpoint.

PU and PVC products have always been known for their ease of cleaning and inherent repellency to stains. In addition to its extreme performance, vinyl has always had a notorious “Achilles heel” when it comes to ink staining. Nano-Tex for vinyl is the solution. Stopping ballpoint pen in it’s tracks.

FEATURES

Spill / Stain Prevention

Performance

Applications

BENEFITS

- Resistance to denim dye transfer, or dye migration. Any dyes can be easily wiped from the surface of the nonwoven product with a dry cloth
- Impeccable protection against ink and pen staining. Difficult to write on, easy to clean
- Protection against staining from dirt and spills including coffee, soda, wine, mustard, salad dressing, blood, urine and iodine
- Stains can be easily cleaned with a dry cloth. If dried and sticky use a mild soap and water mixture, or a small amount of hand sanitizer for a stubborn spot
- Extends your product life by keeping your vinyl free from multiple stains, extending the product life and saving you money on replacement costs
- Enhances abrasion results
- For healthcare, hospitality, institutional, educational, entertainment and any extreme environments
- Primarily used fabric in high use seating applications, especially where repeated and frequent cleanings occur
